Annual Indexes

Volume 4—October 1974 to July 1975

1. Subject Index

A

Absolute color rendering 25
Absorption method, Lighting Calculations by the 183
Ac characteristics of mercury arc lamps, Theoretical prediction of 253
Aircraft/airline industries—manufacturing and maintenance, Lighting for the 207
A new generation deluxe fluorescent lamp—combining an efficacy greater than 80 lm/W with a color rendering index of about 85 90
A new generation of metal halide lamps 106
An ultra high efficacy HID lamp 249
Application to gas-filled incandescent, Diffusion-limited evaporation in a temperature gradient and 198
Arc lamp, Energy balance of the scandium-sodium iodide arc lamp ... 260
Arc lamps, Theoretical prediction of ac characteristics of mercury 253
Arcs, Convective effects in 265
Area and sports lighting installations, IES guide for photometric measurements of 60
A survey and analysis of important visual tasks in offices 150
A validation of the color-preference index 48

B

Book reviews 233
Bulb diameter and fill pressure, Evaluation of F40 fluorescent lamps as a function of 243
Burnout, Effect of variations in coil pitch on 280

C

Calculations by the absorption method, Lighting 183
Calculations, Position index in VCP 99
Calibration of photoelectric control devices, IES guide for 69
Coil pitch on burnout, Effect of variations in 280
Color-preference index, A validation of the 48
Color rendering, Absolute 25
Color rendering index of about 85, A new generation deluxe fluorescent lamp—combining an efficacy greater than 80 lm/W with a 90
Committee Reports
  IES approved method for life testing of general lighting incandescent filament lamps 72
  IES approved method for life testing of HID lamps 66
  IES approved method for photometric measurements of HID lamps 229
  IES guide for calibration of photoelectric control devices 69
  IES guide for Photometric measurements of area and sports lighting installations 60
  IES guide for photometric measurement of roadway lighting installations 154
  Lighting for the aircraft/airline industries—manufacturing and maintenance 207
  Lighting outdoor locations of electric generating stations 220
  Lighting roadway safety rest areas 75
  Roadway sign illumination 78
  Tennis court lighting—a revision to the IES sports lighting practice ... 292
Computation of equivalent sphere illumination, On the 129
Convective effects in arcs 265

D

Design of the optimal intensity distribution of a luminaire in terms of visual performance potential, Veiling reflections and the 53
Design, Optimization—a synthetic approach to lighting 286
Diffusion-limited evaporation in a temperature gradient and application to gas-filled incandescent lamps 198
Dirt depreciation and maintenance, Reducing theory to practice—luminaire 177
Discomfort glare, The pupillary response and 307
Discussion of previously published papers 157,234
Distribution of a luminaire in terms of visual performance potential, Veiling reflections and the design of the optimal intensity 53

E

Effect of variations in coil pitch on burnout 280
Efficacy HID lamp, An ultra high 249
Electric generating stations, Lighting outdoor locations of 220
Electromigration and improved filament life of microminiature lamps, Observations on 19
Energy and cost saving kryptron filled incandescent lamps 188
Energy balance of the scandium-sodium iodide arc lamp 260
Equivalent sphere illumination, On the computation of 129
European approach to the luminance aspect of roadway lighting 111
Evaluation of F40 fluorescent lamps as a function of bulb diameter and fill pressure 243

F

Filament life of microminiature lamps, Observations on electromigration ... 19
Fixed and vehicular illumination systems on city streets, Interaction between 3
Fluorescent lamp, A new generation deluxe 90
Fluorescent lamps as a function of bulb diameter and fill pressure, Evaluation of F40 243
Fluorescent lamp starting aids—how and why they work 29
Fluorescent luminaires, IES approved method for photometric testing of outdoor 296
Flux measurements of ultraviolet emitting light sources, Radiant 36

G

Gas filled incandescent lamps, diffusion-limited evaporation in a temperature gradient and application to 198
Glare, the pupillary response and discomfort 307

H

Heat and mass transport in gas filled incandescent lamps 271
HID field measurements vs data calculated from photometry 84
HID lamp, An ultra high efficacy 249
HID lamps, IES approved method for life testing of 66
HID lamps, IES approved method for photometric measurements of 229
High efficacy low wattage HPS lamp for street lighting and other applications 204
Hot spot length on the behavior of straight wire incandescent filaments, The effect of 163
HPS lamp for street lighting and other applications, High efficacy low wattage 204
HPS lamps—the application of Penning mixture starting gases (Abstract) 279

I

IERI project 84—The pupillary response and discomfort glare 307
IES approved method for life testing of general lighting incandescent filament lamps 72
IES approved method for life testing of HID lamps 66
IES approved method for photometric measurements of HID lamps 229
IES approved method for photometric testing of outdoor fluorescent luminaires 296
IES guide for photometric measurements of area and sports lighting installations 60
IES guide for photometric measurement of roadway lighting installations 154
Illumination systems on city streets, Interaction between fixed and vehicular 3
Incandescent filament lamps
Incandescent filament lamps, IES approved method for life testing of general lighting 72
Incandescent filaments, The effect of hot spot length on the behavior of straight wire 163
Incandescent Lamps
  Diffusion-limited evaporation in a temperature gradient and application to gas-filled 198
  Energy and cost saving krypton filled 188
  Heat and mass transport in gas filled 271
Interaction between fixed and vehicular illumination systems on city streets .. 3
Introducing the candidates 239
Irradiance from illuminants in terms of proposed public health standards, Measurement and ultraviolet 43

J

Judd memorial collection 119

K

Krypton filled incandescent lamps, Energy and cost saving 188

L

Lamps for assessing metamerism 11
Life testing of general lighting incandescent filament lamps, IES approved method for 72
Life testing of HID lamps, IES approved method for 66
Lighting calculations by the absorption method 183

Lighting design, Optimization—a synthetic approach to ... 286
Lighting design with generalized reflectance ... 171
Lighting for the aircraft/airline industries—manufacturing and maintenance ... 207
Lighting outdoor locations of electric generating stations ... 220
Lighting roadway safety rest areas ... 75
Light Sources
A new generation deluxe fluorescent lamp—combining an efficacy greater than 80 lm/W with a color rendering index of about 85 ... 90
A new generation of metal halide lamps ... 106
A new generation of metal halide lamps ... 106
An ultra high efficacy HID lamp ... 249
Convective effects in arcs ... 265
Diffusion-limited evaporation in a temperature gradient and application to gas-filled incandescent lamps ... 198
Effect of variations in coil pitch burnout ... 280
Energy and cost saving krypton filled incandescent lamps ... 188
Energy balance of the scandium-sodium iodide arc lamp ... 260
Evaluation of F40 fluorescent lamps as a function of bulb diameter and fill pressure ... 243
Fluorescent lamp starting aids—how and why they work ... 29
Heat and mass transport in gas filled incandescent lamps ... 271
HID field measurements vs data calculated from photometry ... 84
High efficacy low wattage HPS lamps for street lighting and other applications ... 204
HPS lamps—the application of Penning mixture starting gases (Abstract) ... 279
IES approved method for life testing of general lighting incandescent filament lamps ... 72
IES approved method for life testing of HID lamps ... 66
IES approved method for photometric measurements of HID lamps ... 229
IES approved method for photometric testing of outdoor fluorescent luminaires ... 296
Measurement of ultraviolet irradiance from illuminants in terms of proposed public health standards ... 43
Observations on electromigration and improved filament life of miniature lamps ... 19
Radiant flux measurements of ultraviolet emitting light sources ... 36
The effect of hot spot length on the behavior of straight wire incandescent filaments ... 163
Theoretical prediction of ac characteristics of mercury arc lamps ... 253
Luminaire dirt depreciation and maintenance, Reducing theory to practice ... 177
Luminaire in terms of visual performance potential, Veiling reflections and the design of the optimal intensity distribution of a ... 53
Luminaires, IES approved method for photometric testing of outdoor fluorescent ... 296
Luminance aspect of roadway lighting, European approach to the ... 111

M

Maintenance, Reducing theory to practice—luminaire dirt depreciation and ... 177
Manufacturing and maintenance, Lighting for the aircraft/airline industries ... 207
Measurement of ultraviolet irradiance from illuminants in terms of proposed public health standards ... 43
Measurements of HID lamps, IES approved method for photometric ... 229
Measurements of ultraviolet emitting light sources, Radiant flux ... 36
